LOCAL INTELLIGENCE. ARRIVALS AND DEPARTURES.

ARRIVALS. HUGH WHITE'S SALT LAKE LINE: T Schaeffer F Henriett B Neibling A Journey

THE renewed activity everywhere apparent is gratifying to all that have the interests of the camp at heart. A considerable amount of bustle has been manifest during the past week. The recent influx of arrivals attracted here by the favorable reports of the new discoveries on the west side is noticeable. The temporary stagnation observable during the Spring, has almost entirely passed away, and there now remains nothing to prevent the prosecution of work. The views of Professor Stewart, the wellknown mining expert, are, on this subject, exceedingly flattering. It is his opinion that the wast amount of ore already extracted from the mountain side is but, as it were, a sample of the comparatively inexhaustible deposit that lies deep in the bowels of the earth.

RAYMOND & ELY.-Since the last report in relation to this mine nothing of marked interest has transpired. Whatever little checks that may have occurred have been entirely obviated, and everything in and around the mine is moving along with the regularity of clock-work. Further developments in the western ground give very favorable indications. The daily amount of ore now being raised is about fifty tons. This ore, as fast as raised, iskaken to the mill and transformed into bullion of a very high grade. The winzes in the eighth and ninth levels are being sunk without much observable change in the nature of the ground. Sinking in the shaft is uninterruptedly continued; the pump, without being driven to its full capacity, is abundantly able to keep the water in subjection, and this much annoying cause of inconvenience no longer wists. The general increase in longer wists. ience no longer exists. The general in-dications of the mine are of the most flattering nature, and denote a successful

AMERICAN FLAG, Jno. R. James Supt .-Everything progresses nicely about the mine. The usual quantity of ore is being daily extracted. There is now on the dump about seventy-five tons, and from the present appearance of the stopes there is every reason to expect a large in-crease in quantity in a short time. The main shaft is now down eighty seven feet below the tenth station, making the total depth of the shaft from the surface 1,087 feet. The shaft is running at an angle of seventy-one degrees to the south, which, at the eleventh station, will throw it south of the ledge eightysix feet. The vein on the tenth level will average eight feet in width, and shows well defined foot and hanging

Procus, T. R. Butler Supt .- The Engine shaft has attained a derth of 908 feet; ground works better; should it hold more rapid progress may be ex- to be heard in chambers at 10 a. m. pected. The ledge on the 660-foot level looks more promising than at last report. On the 860-foot level the east drift has been extended on the ledge 129 feet, west drift 110 feet, face of both show some and snots of ora high in show seams and spots of ore high in grade. At a further depth of 52 feet another station will be opened, when developments of importance may confidently be expected, as the vein of this company has improved continuously as the workings have progressed in depth.

ALPS, A. J. Blair Supt .- Work of extracting ore continued vigorously. Durthe last week struck into a portion of the ledge which was 2½ feet wide with first-class ore. The mine now presents a better appearance than it has done since the present Supt. took charge. Have been shipping ore steadily during the past week to the Newark mill, the result of which will will be the steady of which will will be the steady of which the steady of which were the state of which the steady of which were the state of which were stated in the state of which was stated in the state of which was stated in the state of which was stated in the stated in t result of which will without doubt open the eyes of everyone as to the future of

CRIEF OF THE HILL, J. W. Wright Supt.—The usual work is being contin-

NEWARE MILL.-This mill completed its run on ore from the Meadow Valley mine and has started to work ore from the Alps, having run steadily on that for the past week. Have plenty of one on hand to keep them busy for some time.

ANTILLES, N. B. Norvall Supt .- The new shaft is now down to a depth of 55 feet. The country rock working very well. Work is progressing as rapidly as the contractors can possibly make it.

Ar the Episcopal Church to-day Bishop Whittaker will officiate at 11 a. m. and 8 p. m. Sunday School at 2 p. m. The sacrament of baptism will be administered at the Sunday school service.

PIOCHE WEST Ex., N. B. Norvall Supt. -Are doing the usual work, drifting and taking out some ore. Prospects are

SPRING MOUNT, N. B. Norvall Supt .-Prospecting and taking out a small quantity of ore still continued in this mine. No change of any importance to note.

On Saturday morning two wagons loaded with barley arrived from San Pete, Utah, consigned to F. W. Clute.

HUHN & HUNT, N. B. Norvall Supt .--Are sinking two winzes, the ledge being large in each one, the ore of a high grade running from \$90 to \$700. On the front ledge about 200 feet of a body of ore has been opened. The back or middle ledge is improving as opened on the west level. The general run of the ore from this mine is pulping \$85 at the mill.

tions have heretofore been opened prop-erly and grades regulated the present management have been laboring under great disadvantages. Now, however, the mine will soon be in excellent condition and the force doubled.

Mgapow Valley, D. M. Tyrrell Supt. -Are extracting ore and running an east drift from No. 3. Are also running near Pioche. He spoke of spirality as being the law of attraction and repulsion as governing extent of the work being done in the extent of the work being done in the mine owing to the water difficulty, but was listened to with marked attention the Supt. is busy getting up plans for putting up heavy tenting machinery on Summit shaft. You was instelled to with marked attention and satisfaction by all who were present. His various ideas were explained by drawings on the blackboard. We hope to have the pleasure of hearing him again before he leaves Pioche.

one winze the food level; some ore in the these some food is width. No ore at present in the drifts. The drifts are in six hundred feet. Work kept up

CONDOR, W. K. Miller Supt.-No paron as usual and the same force of men employed as heretofore. Should any change of note in the appearance of the mine occur the Supt. will report to us immediately.

James Bass Killed.

Last evening about 6 o'clock James Bass, a colored man who drove a job wagon, was drunk and disorderly, and, creating a general disturbance on Main street, was arrested by officers Mc-Kee and Kelly. After being admonished to behave himself, which he promised to do, he got into his wagon and, from what we could learn from general talk, he turned to McKee and Kelly and called them sons of b-s, telling them he was going to get his gun and come after them, with which he drove off hastily. Officers McKee and Kelly followed down the street with the intention of arresting him. Officer Kelly approached the house on the side toward Lacour street, and officer McKee went a short distance around on the other side of the fence. Immediately on their nearing the fence.
Bass opened fire on them, firing two shots before either of them had the slightest idea he would resist an arrest. Officer Kelly immediately jumped be hind a wagon and commenced to fire, as did McKee, Bass keeping up a snapping of his pistol, which, after firing five shots, the last one failed to go. Bass was struck twice, once over the left nip-ple and once in the belly. He died about fifteen minutes after the occurrence. In his attempt to shoot McKee be grazed the side of the house, the ball passing along-side of McKee. If it had not been for the wagon intervening, Officer Kelly punctual attendants: Stella Armer, would certainly have been hit. We have taken particular pains to inquire into taken particular pains to inquire into this matter, and, from all we can hear, ton, Nellie Saunders, Adolph Jacobs. are satisfied that no blame rests on the officers at all. They were simply discharging their duty, and in doing so imperiled their lives. Dr. Deal, the Corolate of the corola

District Court.

In the District Court to-day the following business was transacted:

In the matter of the Estate of Alfred Snell, deceased, letters of administration were granted to Eliza Snell, on her giving bonds in the sum of \$250.

J. W. Peck vs. W. C. Glissan and H. C. Bishop; defendants allowed to, and including the 19th of July, to answer.

Stephen Vivian vs. Margaret Vivian; defendant allowed until Monday, June 28th, to file answere herein, and by consent of counsel in open court it was ordered that the hearing of the order to show cause herein set for Monday, June 28th, in open court, be and the same is hereby continued till Thursday, July 1st,

State of Nevada vs. John McGaban, indicted for assault with intent to com-mit great bodily harm; said cause was set for trial yesterday, said defendant not appearing in court, and being called at the door of the Court-house and not answering to his name, the sureties on his bail bond were also called at the door of the Court-house, and not answering to their names when so called, and on motion of George Goldthwaite, District Attorney, it was ordered that the bonds of said defendant be and the same are declared forfeited.

Snodgrass vs. Hill; motion for a new trial overruled and stay of proceedings granted for ten days.

Mary Jane Williams vs. Newark Silver M. Co.; defendant herein allowed to, and including July 15th, to answer. Court adjourned for the term.

PROF. W. FRANK STEWART visited several of our mines on Thursday last, and from him we have the following report, which is worthy of notice as showing the impression made on scientific men by ned on this mine and ore is being extracted. They have a large amount on the ore dump which the mill will work about the first of next month. The Supt. has presented the Centennial Commissioners with a number of fine specimens, the assays of which at the Pioche assay office went \$1,105.84. These specimens were taken from the ore pile that is to be worked.

The Havana mine is a well formed fissure vein; walls being perfect, clearly belongs to the system as a permanent mine, all it lacks being depth. The Havana is not being worked at present, owing to a lack of the necessary capital to keep the work going when once started, but the owners are in hopes to arrange matters satisfactorily shortly. St. George mine is a genuine contact mine between the calcareous slates and limestone. The clay seam indicates permanency. This is a good mine. Mr. Stewart also visited the several mines on the west side of the ridge, and took a hasty view of all of them, observing the work being done. Lack of time prevented him making any report on them. He reported on the ore in most of the dumps as being extremely rich. Chloride ore full of horn silver.

THE Mystic Krewe of Comus held a large meeting last night. Committees were appointed to attend to financial and other affairs. Adjourned till Wednesday, June 30th, for the committees to make

their final report. FIVE-STAMP MILL, Bullionville, -Are running constantly on ore and have a large supply on hand. The working of the various lots give entire satisfaction.

THE following passengers will arrive on this evening's Hamilton stage: Jos. Opie, Jas. Troonson, A. Jewell.

LECTURE LAST EVENING. - Prof. W. This mine has never looked better since Frank Stewart lectured last evening at and copper ware manufactured or repairthe first day's work was commenced by the Court-house to another large audithe present Supt. There is 300 feet in ence of ladies and gentlemen, the sublength of continuous ore in one stope. ject being the "Electrical Philosophy of the Universe." His commencement of the subject was on the recent watering of the streets, showing how it was conducive to the health of all. Spoke of the human body being composed of 76 parts of hydrogen and water and 24 parts of solid substance, and that the prepon-derance of water in the system made it SILVER PRAK, T. R. Butler Supt.—The necessary that it should have a chance ledge on the 600-foot level is opening up to absorb more or less water. He gave the causes that produced light and mosplendidly. The vein grows larger as tion, also spoke of the spectroscope or drifting extends, showing pockets of ore assaying as high as \$130. The vein runs through pure quartz. As no staous elements in the body, could detect the minutest trace of peison, etc. He related how the moon revolved on its axis around the earth, and stated that the motion was getting slower gradually, that it would finally cense, when the moon would fall to the earth, and as it is one-sixteenth the weight of the earth It would create some little stir when it

Jry Legyronwert, who was Sheriff of Lander county in the good old times of '63 and '64, arrived in Pioche yesterday from Arizons, Panamint, and all the rest of the mining camps south of Lincoln county. He is looking well and hearty ticular change in this mine, work kept and not changed any since we saw last on as usual and the same force of men On his way to Bullionville he lost his On his way to Bullionville he lost his way and wandered around a couple of days without water, and was pretty badly off when he reached that burg. Jim is not favorably impressed with the prospects of those camps he visited and don't think they will do to tarry with. Arizona acceptably it his avaration. He will store especially is his aversion. He will stay in our midst a short time, and probably

finally make his permant residence here YESTERDAY morning an alterestion took place in a restaurant on Meadow Valley street, in which two white men and one Mongolian participated. The trouble was about a breakfast ordered, which the Chinaman had not cooked right, and, on the proprietor remonstrating with him, the Chinaman picked up a hatchet and commenced to slash away. It was

charging their duty, and it down periled their lives. Dr. Deal, the Coroner of Lincoln county, will hold an inquest this (Sunday) morning at 9½ for sentence and was fined \$1 and costs. He was given until Monday 28th inst. to settle. Attachment suit of M. P. Blum vs. S. N. Moore & Co.

Lost, on Friday the 26th inst., from Wells, Fargo & Co.'s office, on the arrival of the Hamilton stage, a black satchel marked with the name of M. Carbas. Please return the same to that office.

Services will be held as usual at the Catholie Church.

The Winnemucca Silver State says Several miners are yet at work in the gulches near the Eagle mine. Owing to he scarcity of water rockers are used exclusively, and it is not unusual for the miners to make ten dollars a day, and all of them average fair wages

SUMMONS.

IN THE DISTRICT COURT OF THE SEV In the district court of the Seventh Judicial District, of the State of Nevada, in and for the County of Lincoln.

Esther Abrahamson, plaintiff, vs. Julius Abrahamson, defendant.

Action brought in the District Court of the Seventh Judicial District of the State of Nevada, in and for the County of Lincoln, and the complaint filed in said County of Lincoln, in the office of the Clerk of said District Court.

The State of Nevada sends greeting to Julius Abrahamson, defendant;
You are hereby required;

office of the Clerk of said District Court.

The State of Nevada sends greeting to Julius Abrahamson, defendant:

You are hereby required to appear in an action brought against you, by the above named plaintiff in the District Court of the seventh Andical District, of the State of Nevada, in and for the County of Linceln, and answer the complaint filed therein, within ten days (exclusive of the day of service) after the service on you of this summons, if served in said county; or, if served out of said County, but within said District, within twenty days, and in all other cases forty days; or Judgment by default will be taken against you, according to the prayer of said complaint.

The said action is brought to obtain a decree of this Court dissolving the bonds of matrimony existing between you, said defendant, and said planning, on the grounds that at the time of said marriage she was only of the age of 15 years 14 months, and that said marriage cerimony was not performed by plaintiff's consent, but was forced and excepted to marriage cerimony was not performed by plaintiff's consent, but was forced and excepted to an except the marriage cerimony was not performed by plaintiff's consent, but was forced and excepted to an except the marriage cerimony was not performed by plaintiff's consent, but was forced and excepted the marriage cerimony was not performed by plaintiff's consent, but was forced and excepted the property of the said marriage cerimony was not performed by plaintiff's consent, but was forced and excepted the property of the said marriage cerimony as a forced and excepted the property of the said marriage cerimony as a forced and excepted the property of the said marriage cerimony as a forced and excepted the property of the said and property of the s

d years 15 months, and that said marriage cerimony was not performed by plaintiff's consent, but was forced and coerced to permit said ceremony to be performed. Since said time she arrived at the age of 16 years and has not consented to said marriage. All of which is more particularly set forth in plaintiff's complaint, to which you are referred, and further, that she be allowed to resume her maiden name of Esther Davis.

And you are hereby notified, that if you fail to appear and answer the said complaint as above required, the said plaintiff will apply to the Court for the relief herein demanded, and for costs of suit in gold coin.

By order of Court.

[Seal] Given under my hand and the said of the Davistor.

[Seal] Given under my hand and the seal of the District Court of the Seventh Judicial Dis-trict of the State of Nevada, in and for the County of Lincoln, this 4th day of June, in the year of our Lord one thousand eight hundred and seventy-five.
